## LASER POINTERS

Under the South Australian Summary Offences Act 1953, laser pointers with an output >1 milliwatt are a prohibited weapon. However, ASSA members who want to use a laser pointer >1 milliwatt are exempt when using it for astronomical purposes. It is strongly advised that members ensure they are able to provide evidence of their membership when using a laser pointer. Members must read the Safety Guidelines re laser pointers at: <https://www.assa.org.au/info/laserpointers>
